

1000T Series

1000 T

Model:

1000 T

Performance Zones:

Multiple

Features:

Multiple Water Depths

Current:

Advanced Water Current

DESCRIPTION

1000 T SERIES

The 1000 T hydrotherapy pool is the largest, most versatile SwimEx pool for professional hydrotherapy. This state-of-the-art pool features a powerful water current with 100 adjustable speeds. There are nine independent workout/treatment zones, ample room for therapy with multiple patients in the pool at the same time, and plenty of space for group classes.

The water surface is 10' x 14' (3.05 m by 4.27 m). For an even larger pool, the 1000 T can be extended up to 8' (2.43 m) longer. There are three standard water depths: 48" (122 cm), 60" (152 cm), 72" (1.83 m). The pool is constructed in four finished pieces and can be assembled on-site or at the SwimEx factory.

For additional functionality, add an integrated treadmill to create the only pool on the market with three distinct water running options: run against the current, run on the treadmill, or run on the angled running platform.

The SwimEx 1000 T offers the most versatile pool on the market to achieve your goals for aquatic exercise, therapy, and conditioning.

FEATURES

1000 T

- Four-piece construction
- Water depths include 72" (183 cm), 60" (152 cm), 48" (122 cm)
