

Professional Triton

Model:
Professional Triton

Water Depth:
50"

Pieces:
1 Piece

Features:
Smooth water flow

DESCRIPTION

PROFESSIONAL TRITON

The Triton is crafted for the customer who demands the best yet needs an entry level price point. This effective one-piece pool features a wide-open layout, 50" (127 cm) water depth, and two benches for seated exercise.

An efficient commercial grade electric motor drives a specially calibrated propeller to create a consistent water current.

The pool features the solid fiberglass construction with an insulated wood core. The interior surface is an easy-to-clean, long lasting gelcoat finish. Two water return channels help maintain the current for a smooth, even water flow in the main exercise area.

The Triton is an ideal option for any facility looking to add a hydrotherapy pool. It is wide enough to treat multiple patients and offer group sessions.

Add an optional integrated treadmill for even more versatility.

FEATURES
